

SRI: SOURCES OF INSTITUTIONAL SUPPORT

SRI has been spreading through diverse and highly decentralized means, as individuals and institutions increasingly understand and act on the opportunities that SRI concepts and methods are opening up for farmers and their families. These methods also benefit consumers and the environment. Below is a listing of NGOs, foundations, international and government agencies that have supported, funded or facilitated the dissemination, adoption, and adaptation of SRI in a diverse set of countries, now over 50. The listing does not include the hundreds of local NGOs and other organizations directly involved with communities in implementing SRI programs.
