Interest of some managers on SRI in Iraq

Khidhir Abbas Hameed
Al-Mishkhab Rice Research Station
Najaf - IRAQ

After experience with SRI methods in Iraq during two years and obtaining their benefits, we decided to expand SRI trials and demonstration fields in many sites to extend these advantages to others. Many lectures and training courses for using SRI methods have been provided that encourage managers to see our work and to get them to help us for expanding SRI knowledge and cooperation.

On a field day held 22 October 2007, Fleyeh Abed Jaber, director of MRRS, gave a great part of his speech on SRI, and he has assumed a great burden in this season to expanding SRI. The following pictures show the interest of managers for SRI in MRRS and some demonstration and comparison fields (2007 season).

Attendees at Field Day on 22 October 2007, from left to right: Director of Rice Development Department; General Director of State Board of Agricultural Research; Head of Najaf Agricultural Committee; and Director of Najaf Directorate of Agriculture

Director of Directorate of Agriculture in Najaf (second from right) saw leveling of field by machine before mechanical transplanting
