## 1.0 Executive Summary

The fourteen (14) years of civil war that ended in 2003 undermined Liberia's development. As progress was made with the post-war recovery between 2003 and 2013, the Ebola epidemic in 2014 struck the nation and two of its neighbors (Guinea and Sierra Leone). This epidemic, one of the worse in history, affected all sectors of Liberia including the agricultural sector thereby leading donors to provide funding toward "Ebola Recovery". In this light, two (2) million USD was given to Liberia by the Japanese government through the International Fund for Agricultural Development (IFAD).

This led to collaboration between IFAD and the Ministry of Agriculture (MOA) to design a project (IFAD-Ministry of Agriculture) that would increase farmers' income by developing the rice and cassava value chains in the ASRP and STCRSP project counties of Bomi, Grand Cape Mount, Grand Bassa, Montserrado and Lofa by strengthening existing rice and cassava processing facilities and increasing farmers' production.

During the reporting period, CHAP and IFAD /PIU conducted an assessment of 36 processing facilities/hubs in the 5 J-Rice Grant project counties: 4 ASRP counties and the one STCRSP county to identify and assess existing rice and cassava processing facilities. Out of the processing facilities/ hubs identified, 20 of them are rice-processing facilities while the remaining 16 facilities are cassava-processing facilities.

The Community of Hope Agriculture Project (CHAP), a national agriculture NGO, with in-depth expertise in Liberia agriculture sector, was selected to implement the Japanese Rice Grant thru IFAD-Ministry of Agriculture.

In addition to the 36 processing facilities/hubs identified during the assessment, there were also 1800 ha of lowland area identified for the purpose of project (J-Rice Grant) implementation in the 5 project counties.

Prior to the assessment, the Community of Hope Agriculture Project (CHAP) carried out several key activities related to the J-Rice Grant link to ASRP. Some of these activities are:

- An account has been opened with Eco-Bank Limited and details sent to IFAD/MOA/PIU
- A comprehensive work plan developed with detailed activities, timelines and budget
- 10 sites were identified in Lofa, Grand Cape Mount and Montserrado and 11 ha were cultivated with rice in Montserrado and Grand Cape Mount, respectively
- CHAP contacted several partners including but not limited to Swiss Development Cooperation (SDC), Food and Enterprise Development (FED), World Food Program (WFP), Welthungerhilfe (WHH), Japan International Cooperation Agency (JICA), etc.
- Identification and assessment tools were developed including Farmers Picture Book
- Procurement of tablets, GPS, SRI weeder, BSC rotary tiller machines, rice mill, etc.
- Publicity on the project was made on UNMIL Radio several times on Coffee Break show
- 11 ha cultivated in Montserrado, Lofa and Grand Cape Mount by VADEMC (Vainga Agriculture Development and Management Consultancy)

Similarly, a verification exercise was also carried out by IFAD/PIU and CHAP so as to authenticate the existing, accessibility and functionality of these processing facilities. In addition, the verification exercise enable CHAP and IFA/PIU to select 17 processing facilities for financing.

The findings and recommendations from these two exercises (assessment and verification) have been submitted to IFAD so as to keep them in the know of functioning and earmarked processing facilities for potential funding under J-Rice Grant Project.

Finally, CHAP has also carried out several preparatory works for the smooth implementation of the Japanese Rice Grant project. Some of the activities carried out are: Recruitment of project staff, preparation of both technicians' and farmers' training manuals, financial requests for field activities for the month of January, comprehensive work plan for the month of January 2017, letters to stakeholders, production of radio jingles, procurement of machines, etc.

#### 2.0 Introduction

The Community of Hope Agriculture Project (CHAP), a national agriculture NGO, with in-depth expertise in Liberia agriculture sector was selected to implement the Japanese Rice Grant thru IFAD-Ministry of Agriculture. The goal of the grant is to address the restoration of productive capacity for Ebola-affected households that are residents of IFAD's five project counties.

In order to realize this goal that is in line with the Ministry of Agriculture/Government of Liberia's new policy under the Liberia Agriculture Transformation Agenda (LATA), IFAD-MOA has decided to implement the Japanese Rice Grant Project in 5 counties (Bomi, Cape Mount, Grand Bassa, Lofa and Montserrado), four of which are ASRP counties, and one an STCRSP County .The project is valued at two million United States Dollars (2,000,000.00).

CHAP has support from the World Bank, CNS-Riz (Mali), SRI-Rice (Cornell University, USA) and the government of Japan through IFAD and the Liberian Government to carry on the Japanese Rice Grant project implementation.

Liberia's legacy of rural underdevelopment and the unfortunate outcome of war and the deadly Ebola crisis have placed the country's most vulnerable citizens (rural women) in ongoing risk. The majority of beneficiaries of IFAD's projects in Liberia, including the Agricultural Sector Rehabilitation Project (ASRP) and the Smallholder Tree Crop Revitalization Support Project (STCRSP), are women-headed households. The projects are implemented through cooperative business organizations; the membership of the supported organizations is 56% women.

#### 2.1 Project Goal:

Economic Recovery of Liberian Rice Farmers in Ebola-Affected Counties

#### 2.3 Project Objective:

- ➤ Complement support provided to Ebola-affected communities involved in rice production in the 5 counties;
- ➤ Build sustainable farming practices by improving farmers productivity through the System of Rice Intensification (SRI);
- ➤ Introduce user-friendly labor-saving implement;
- ➤ Improved quantity and quality of local rice production as a result of the training and equipment received;
- ➤ Increase farmers' incomes and expand the cycle of rice production and processing in these areas.

#### 2.4 Project Components:

- 1. Build capacity and strengthen institutions
- ➤ Resuming training support using the existing ASRP modalities and the SRI-Rice approach
- ➤ Provide training for cooperatives, farmer organizations, etc.
- 2. Farmer result-driven methodology and demonstration
- > Farmer-adapted SRI methods in their farming to increase crop productivity
- 3. Development and dissemination of communication mechanism/tools on SRI
  - ➤ Develop and disseminate to farmers' IEC materials on SRI method
- 4. Provision of equipment and dissemination of labor-saving devices for production and processing
  - Rehabilitating approximately 15 community rice centers at the community level with equipment including rotary tillers, rice threshers, and rice transplanters

## 2.5 Methodology:

CHAP developed assessment tools for the collection of appropriate information and work closely with MOA field staff using the following approaches:

- Communications using emails, phone calls, and radio announcement to key actors like MoA CACs and DAOs, NCSCC, NGOs, MIA, local county authorities, and other stakeholders informing them of the assessment and it purpose.
- Focus group discussions and key-informant interviews, field visits
- Photographing, GPS collections
- Desk reviews, inspecting revenue records of existing hubs, sales, expenditures, and equipment
- One-on-one discussions with the management teams, review of business records, and processing equipment, physical observations of facilities as well as key-informant interviews.

#### 3.0 Activities Implemented by CHAP from October 2016-January 15, 2017

The Community of Hope Agriculture Project (CHAP) carried-out the following key activities related to the J-Rice Grant link to ASRP;

- An account has been opened with Eco-Bank Limited
- Comprehensive work plan was developed with detailed activities, timelines and budget, submitted to IFAD in 2016
- Verification of processing facilities and farm sites identified in Lofa, Grand Cape Mount Montserrado, Bomi and Grand Bassa, respectively
- Official letters introducing the project objective and goals have been sent out to stakeholders in project counties, to District Representatives, Senators, Commissioners, Paramount Chiefs, and is ongoing
- Procurement of additional farm machines and tools
- Meetings held with Africa Rice, and IFAD/PIU on coordination and implementation strategies
- Interview with CNN "Market Place Program" on our program and strategy
- Ask to make official presentation on the overview of project at the Agriculture Coordinating Committee (ACC) meeting for MOA on January 26, 2017
- Developed project facts sheet, training sch/eduled for SRI TOTs and farmers, new TV jingles, project GPS map of sites verified, etc.

## 3.1 Verification of Processing Facilities and Farm sites

In an effort to achieve the goal of the Japanese Rice Grant for cassava and rice value-chain development which is in line with the Ministry of Agriculture's and Government of Liberia's new policy under the Liberia Agriculture Transformation Agenda (LATA), IFAD-MOA and CHAP have carry out an assessment in 5 project counties (Bomi, Cape Mount, Grand Bassa, Lofa and Montserrado): 4 ASRP counties and the one STCRSP county to identify and assess existing rice and cassava processing facilities. The table below shows the summary of cassava and rice processing hubs identified during the first assessment.

Table 1.0 Summary table of cassava and rice processing hubs identified

No	Name of County	Total # of profiled hubs	# of profiled rice hubs	# of profiled cassava hubs
1	Bomi	7	3	4
2	Montserrado	11	2	9
3	Grand Bassa	5	3	2
4	Grand Cape Mount	2	1	1
5	Lofa	11	11	0
	Total	36	20	16

<sup>&</sup>quot;Improving the livelihood of urban and rural farmers"

Additionally, the assessment was also able to identify 1800 ha of lowland area in the 5 project counties for the purpose of the Japanese Rice Grant project implementation.

Table 2.0 Summary of lowland areas identified

Activity	Location		# of	# of	
			Technicians	Aggregators	Milestones
Identification	Lofa	Kolahun	9	5	1100 ha
of existing lowland rice		Foya			
fields for		Voinjama			
production using SRI	Montserrado	Urban/Mt Barclay	2	3	240 ha
methodology		Todee			
	Bomi	Tubmanburg	2	3	220 ha
		Klay			
	Grand Cape	Tewor	1	2	120 ha
	Mount	Porkpa			
	Grand Bassa	Compound 2	1	2	120 ha
		Compound 1& 2			
	То	tal	15	15	1800 ha

The verification mission was held from December 16, 2016 to January 6, 2017 with the following objectives;

- 1. To verify processors identified by recent assessment done by CHAP
- 2. To double-check which ones are ready for funding and support
- 3. Find out from the owners (entrepreneurs) whether they have business plans

The team verified 22 processing facilities in the ASRP Counties (Montserrado, Grand Bassa, Bomi and Grand Cape Mount) including Lofa from December 16-January 6, 2017. Below are key findings of the exercise:

- 1. Out of the 25 shortlisted processing facilities, 17 facilities (10 Rice hubs and 7 cassava hubs) were selected based on their performance, leadership, potential, and demand for the finished products by consumers.
- 2. 95% of the facilities visited are functional
- 3. Most the facilities were actively producing for the season base on market demands
- 4. They are accessible, visible, and representative
- 5. Most facilities are situated in production areas
- 6. Most owners of these facilities lack working capital to purchase raw materials
- 7. Poor quality of machines with limited capacity to do only half or one ton per day
- 8. 22 facilities were verified (15 rice hubs, 7 cassava hubs) including 14 rice fields
- 9. GPS map for all sites developed and posted (inclusive of all sites visited)

## 3.2 Meetings held in support of Project

There have been several productive meeting and exchanges held during this period with CHAP, IFAD, CARI, Africa Rice, and others in support of the project for successful implementation. Objectives of all these meetings and exchanges were centered on the following;

- Ensuring that everything is ready for implementation
- Compliance issues
- Roles and responsibilities of each party involved
- Planning
- Building collaboration with key actors like LADA-USAID and Africa Rice in the area of value-chain development and training etc
- Reviewing priority and realities on the grounds

<sup>&</sup>quot;Improving the livelihood of urban and rural farmers"

Outcome of CHAP and IFAD/PIU meeting on December 16, 2017

No.	Agreed Action /Activities	Timeline	Person Responsible
1.	Signing of Contract with CHAP & IFAD	Dec.16-29, 2016	Procurement/IFAD/PIU
		2 weeks	
2.	Field visit to verify the 15 selected rice and cassava	Dec. 19-23, 2016	Patrick, FUN& Robert
	processors and to have LADA as part of the team		
3.	Submission of No-objection for advance payment to	Dec.19, 2016	Princetta IFAD/PIU
	CHAP by IFAD to Rome IFAD		
4.	Open of account by IFAD	Dec.16-29, 2016	Priscilla IFAD/PIU
5.	CHAP to submit request major line items for	Dec. 19, 2016	Priscilla IFAD/PIU and
	US\$100,000		Esther CHAP Finance Head
6.	CHAP to implement the procurement using CHAP	Dec.19, 2016	CHAP and IFAD
	procurement manual with technical support from		
	IFAD Procurement Officer. CHAP to submit copy		
	of procurement plan		
7	Review and update work plan	Dec.16-29, 2016	IFAD/PIU and CHAP
8	CHAP to develop a system for timely tracking of	Dec.16-Jan 5, 2017	CHAP
	data and reports from the field		
9	All key staff working on the project should	Ongoing	CHAP and IFAD/PIU
	familiarize themselves with the M&E framework on		
	page 5-6 send via email by Ndaya on Dec.16,2016		

#### Agreed Action from CARI, Africa Rice, IFAD and CHAP meeting in January 11, 2017

- Africa Rice commended CHAP for level of work and leadership in support of rice and the agriculture sector in Liberia
- Africa Rice and CARI committed to working and collaborating with CHAP and IFAD on the Japanese Rice Grant in areas of innovations, technology transfer, and value chain development, including training based upon area of need by CHAP and IFAD
- IFAD Liberia will contact IFAD Rome on possible areas of collaboration

#### 3.4 Challenges

The project is being welcome by so many, and interest has been intense due to the relevance of the project. However, there have been couple of constraints encountered since the inception of the project such as:

- Delays in commencement of full field activities
- Delays in signing of the contract
- Delays in disbursement of payment to carry out approved activities
- Continuous changes in activities
- Delay in getting No-objection
- Delays in taking actions for agreed activities

#### 3.5 Recommendation

CHAP recommends the following for actions

- 1. Reimbursement of CHAP project-related costs such as BCS rotary tiller, garden weasel, seed rice, field work, administrative cost (payment of staff from December 2016, fuel for vehicles and generator, DSA, stationeries, phone cards, and internet subscription), etc.
- 2. That contract be signed before end of January
- 3. Commencement of additional field work this January 2017 such as mobilization, SRI TOT, farmers' training, and launching of project
- 4. Timely disbursement and replenishment of funds to carry out project activities
- 5. Timely feed-back

chapsriliberia@yahoo.com

December 27, 2016 Hon.Mariamu B. Fofana Representative Dist.#4 Voinjama District Lofa County Republic of Liberia

Dear Hon. Fofana,

#### Ref. Japanese Rice Grant for Economic Recovery in 5 affected Ebola Counties

Compliments and honor, we are pleased to inform you about the Community of Hope Agriculture Project (CHAP) activities in your county.

Community of Hope Agriculture Project (CHAP) is a national initiative working in urban and rural communities in Liberia since August 2008; as a result of the human need and in keeping with the scriptures. CHAP is the focal organization and leader for the System of Rice Intensification (SRI) and System of Crop Intensification (SCI) in Liberia under the West Africa Regional SRI body, with expertise in rice and cassava.

We are currently implementing a project that aims to work with 1800 lowland rice farmers; (1 hectare per farmer on 1800 hectare) in Lofa and ASRP counties (Grand Bassa, Bomi, Grand Cape Mount, and Montserrado) with financing from the Japanese government and Liberian government through the Ministry of Agriculture (MOA) and International Fund for Agriculture Development (IFAD). The Project is geared to introduce the System of Rice Intensification (SRI), ensuring that farmers adapt SRI in their way of farming for increase productivity, income, introduce labor saving devices such as power tiller and garden weasel and promote the rice and cassava value chain by building the capacity of entrepreneur, specifically out-growers, processors, off-takers and marketers.

In this regards, we want to inform your honorable office that your county is among the above listed counties for said project implementation and as such we find it prudent to formally let you know we will be working with some lowland rice farmers in your county for this project.

We appreciate your usual corporation and support as we all strive for self-sufficiency in food production in Liberia.

Yours Sincerely,

Rev. Robert S.M. Bimba
Executive Director/ SRI Focal Person
